Stormwater BMPs for Oil & Gas  
BMPs for Working in Waterways  
BMPs for Linear Construction

- ALSO -

Construction Site Field Trips  
Individual Safety Topics; Forklift,  
HazCom, PPE, Fire Safety & more

# Stormwater Compliance Inspections

## Conducting Stormwater Compliance Inspections Based On The Construction Stormwater Permit

Learn The Inspection Process  
Created By The CDPHE-WQCD To  
Evaluate And Verify Construction  
Site Compliance Based On The  
Permitting Requirements

**Altitude Training Associates, LLC**

## - COURSE DESCRIPTION -

This 2-day training course has been developed by Altitude Training Associates for personnel responsible for the required Inspections under the Construction Stormwater Permit.

Day-1 is in the classroom with a representative of ATA and the Water Quality Control Division (WQCD) discussing the Division's process for evaluating SWMPs, Record-Keeping and Site Controls for Compliance with the Colorado Discharge Permitting Systems Stormwater General Permit for Construction Activities. Day-2 is in the field conducting mock inspections with a representative of ATA and the WQCD. Included, are discussions and examples of how WQCD representatives document their inspection findings.

**Class size limited to 22.**

**Student Training Manual provided for all participants.**

## - TRAINING TOPICS -

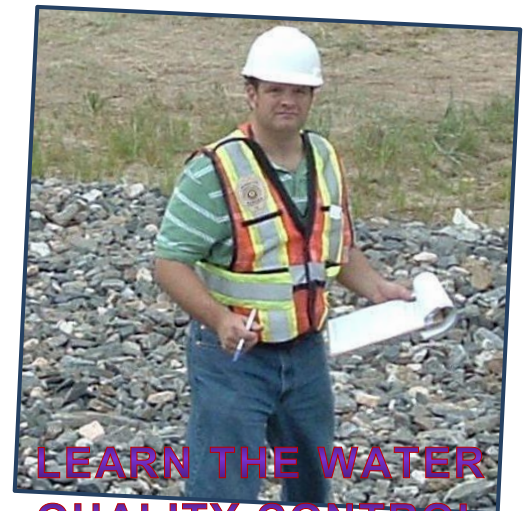

- Construction Stormwater Permitting Conditions
- Preparing for the Inspection
- Evaluating SWMPs & Record-Keeping
- Accessing Site Drainage Patterns
- Identifying Potential Sources of Pollution
- Verifying Functional Controls Installed and Implemented in the Field
- Taking and Assembling Quality Photographs
- Documenting Inspection Findings

### **Course Material Specifically Covers:**

The Inspection Process developed by the WQCD to evaluate construction site record-keeping and field conditions. The required written components required to adequately document Inspection Findings in report-form.

**Take the Subjectivity  
Out of Your  
Inspection Process**
