

BMP 102 Field Academy Hands On Training Program

June 12, 2018 – Bozeman, MT

This is Hands on Training in the field. Come out and construct BMPs for erosion and sediment control and then watch your work as we apply water to it to see how it functions!

LEARNING OBJECTIVES

Upon completion of this class, you will be able to:

- Install a BMP according to its' specification (installation detail) and SWPPP narrative.
- Evaluate an installed BMP based on its' specification.
- Evaluate a BMP's performance during and after a simulated storm event.

BMP 102 BMP Field Academy Hands On Program

The BMP Field Academy is a one day program in which the participants install erosion and sediment control BMPs in groups. Class size is limited to 15 people. The program is conducted on an actual construction site. This program is designed to provide students with hands on experience and the evaluation process for installed BMPs on site. The most unique and insightful element is the application of water to simulate a storm event. This provides the opportunity for the participants to observe the practices under storm conditions and best evaluate its' performance and function.

This class offers students the opportunity to learn about installation techniques while actually doing the installation. This program is always rated by the participants as the best learning experience for erosion and sediment control.

BMP 102 BMP Field Academy

Bozeman, MT ~June 12, 2018 ~ 8 AM – 3 PM

Cost: \$250/person

Location: To Be Announced (we will send you directions to the site)
