

Conducting Storm Water Construction Compliance Evaluation Inspections, BMP-301 October 17 & 18, 2017

This 2 day course is designed for inspectors conducting compliance evaluation inspections of Best Management Practices used to control erosion and sediment and other construction site pollutants.

BMP 301: Conducting Storm Water Construction Compliance Evaluation Inspections

This class is for compliance inspectors and does not cover how to complete a routine inspection as a requirement of the DEQ General Permit for Storm Water Discharges Associated with Construction Activity (Permit). The course is designed around how DEQ Water Protection Bureau compliance inspectors prepare and conduct compliance evaluation inspections of construction sites permitted under the Permit. The course will address topics that will prepare inspectors for consistent inspection procedures

Prerequisite: Successful Completion of the BMP 101: Storm Water Management Course.

This advanced level course will cover the following topics:

- Describe Procedures For Conducting Compliance Evaluation Inspections
- List The Elements Of Finding Noncompliance
- Describe The Record Keeping Requirements Permitted Sites
- Examine Appropriate Applications, Installations, and Maintenance Of Best Management Practices
- Generate A Report To Document Findings

BMP-301
