CLASS DESCRIPTION (Instructor: Scott Olson)

The 2 day program includes a field trip to a construction site and is intended for those individuals preparing or implementing WY Storm Water Pollution Prevention Plans (SWPPP) or CO Stormwater Management Plans (SWMP). If you are conducting self-inspections on construction sites, selecting control measures (BMPs) and preparing maintenance plans, you should attend this class. The program includes the application of the permit requirements to general construction as well as oil and gas activities. The curriculum is intended to meet the requirements for a SWPPP Administrator, Preparer or Qualified Stormwater Manager.
