

ANNOUNCEMENT

Certified Qualified Stormwater Manager (QSM)

In Person Class

August 8 & 9, 2024

Registration: www.altitudeta.com

This two-day training program has been developed by Altitude Training Associates (ATA) to meet the knowledge and skills required to be a Qualified Stormwater Manager (QSM) including implementation of the SWMP and conducting routine inspections. The QSM must be skilled at site and control measure evaluation to effectively implement the SWMP in its entirety. This is a certification class. The certification is valid for 3 years. A recognized refresher program is required every 3 years to keep the certification.

Prerequisite

The QSM Certification Program is an intermediate training program. Understanding the fundamentals of Stormwater Management for Construction Activities is a prerequisite.

Learning Objectives

Upon successful completion of the training program, you will be able to:

- Describe the responsibilities of the Qualified Stormwater Manager (QSM)
- Evaluate a SWMP for completeness & adequacy to facilitate implementation
- Select adequate control measures based on site conditions and pollutants
- Evaluate implemented control measures for proper installation, maintenance, and application to the site conditions.

COST: \$500/person
